How many cells are in a 540 watt solar panel?

To give you an idea, a standard 540 watt solar panel is approximately 88 x 46 inches and tips the scales at around 72 pounds. Most modules with this output rating are monocrystalline and typically have at least 72 cells (144 half-cut cells). Efficiencies vary widely from brand to brand, but most monocrystalline options fall into 18-22% range.

What is the warranty on 540 W solar panels?

Installing 540 W solar panels is simple enough, despite their larger size compared to standard panels. They typically come with a 25-year warranty, though some higher-end brands offer 30-year protection. Use our solar calculator to determine the optimal size for your installation.
