

Advantages of zinc-magnesium-aluminum photovoltaic bracket

What is the best corrosion protection for solar mounting structures?

Your contacts when it comes to high-performance corrosion protection for solar mounting structures: Arne Schreiber, Product Management and Jennifer Schulz, Surface Development. ZM Ecoprotect ® Solar offers several advantages compared to pure zinc coatings.

Which steel is best for PV mounting?

To do so, it requires a robust supporting structure made from high-quality steel with effective corrosion protection. With ZM Ecoprotect ® Solar, thyssenkrupp Steelnow offering high-performance, zinc-magnesium-coated steels for PV mounting systems - durable, robust and sustainable.

Why should you choose ZM ecoprotect ® solar?

The new coating is the consistent economic further development as an alternative to batch galvanizing. The guaranteed service life of up to 25 years also leads to low maintenance expenditure on the PV ground-mounted systems. With ZM Ecoprotect ® Solar, we are clearly offering extra sustainability.

3 · Zinc-Aluminum-Magnesium alloy products have the following advantages: 1. Anti-corrosion property is 10-20 times better than galvanized steel materials., ... A solar carport is a structure that combines the benefits of a ...

Compared with steel photovoltaic brackets, zinc-aluminum-magnesium photovoltaic brackets are equally strong but lighter in weight, giving them more advantages in complex terrain ...

GQ-T Intelligent Photovoltaic Tracking Bracket System That Moves With The Sun; GQ-D Series Distributed System, Distributed PV Bracket, High-strength steel plated with aluminum ...

The quality and cost of the key support structure of PV mounts are critical to the performance and value of the entire PV system. Aluminum alloy, traditional carbon power ...

Advantages of zinc-aluminum-magnesium photovoltaic brackets: Lightweight design: Zinc, aluminum, and magnesium are lightweight and high-strength, which can significantly reduce the weight of photovoltaic brackets.

Zinc-aluminum-magnesium photovoltaic brackets are used in centralized photovoltaic power plants nationwide, with high strength and good corrosion resistance of more than 30%. Zinc ...
