

Airbus was evaluating the "High Altitude Platform Station" (HAPS) onboard the British-built UAV during an 18-day journey in the stratosphere, 76,100 feet above the earth's surface. ... Solar ...

The aircraft runs on solar power and is also retrofitted with advanced climate and data analysis modules to successfully maneuver in varied weather conditions. ... AI pilots, and ground station installations, catering to aerospace professionals ...

Shanghai Aerospace Automobile-Jinchang Solar PV Park is a 25MW solar PV power project. It is located in Gansu, China. According to GlobalData, who tracks and profiles over 170,000 ...

Shanghai Aerospace Automobile-Zhangye Solar PV Park is a 30MW solar PV power project. It is located in Gansu, China. According to GlobalData, who tracks and profiles over 170,000 ...

In 2023, the aerospace and defense (A& D) industry witnessed a revival in product demand. In the aerospace sector, domestic commercial aviation revenue passenger kilometers surpassed ...

China has made significant strides in space exploration over the past two decades, from launching its first manned mission in 2003 with taikonaut Yang Liwei to the landmark completion of the construction of the China Space ...

Solar cells (SCs) are the most ubiquitous and reliable energy generation systems for aerospace applications. Nowadays, III-V multijunction solar cells (MJSCs) represent the standard commercial technology for powering spacecraft, ...

The Aerospace Corp. is calling for U.S. government agencies to work together to develop space solar power technologies in a paper that underscores the importance of collaborating with international...
