

Agent Solar Photovoltaic Power Generation Fraud

Is going solar a scam?

It's likely a scam. While there are some government-funded solar programs for households that qualify, "going solar" isn't free. Honest businesses will tell you exactly how much it'll cost to get and install solar panels. Here's how to steer clear of the scams: Do some research.

Are free solar panels a scam?

Know that "free" or "no cost" solar panel offers are scams. The federal government does not install solar systems in homes for free. If you're considering whether solar energy is right for you, check out the Department of Energy's guide for homeowners and learn more. Or check out the Department of Treasury's guidance on clean energy.

What are the most common solar scams?

One of the most prevalent solar scams involves misleading lease agreements or power purchase agreements (PPAs). While these financing options are legitimate ways to access solar energy, unethical companies may misrepresent the terms or benefits of these agreements.

Are people deceived by solar financing companies?

We don't want people deceived, though," says Adam Welle, a lawyer with the Minnesota Attorney General's Office who is pursuing a case against solar financing companies. Beyond the industry's reputation, real people - many of them already financially vulnerable - have been hurt.

Are solar business leads a scam?

At best, this is someone generating leads to sell, not actual solar businesses. At worst, they're scammer trying to steal your identity. If you spot a scam, tell the Federal Trade Commission at [ReportFraud.ftc.gov](https://www.ftc.gov/report-fraud).

How do I know if a solar contract is a scam?

Pay attention to warranties, cancellation policies, payment schedules, and try to spot any hidden fees. Honest businesses will give you time to go over the terms of the contract, understand the agreement, and let you sign it in writing. To learn more, visit [ftc.gov/solar](https://www.ftc.gov/solar). And if you spot a scam, tell the FTC.

The sun is the source of solar energy and delivers 1367 W/m² solar energy in the atmosphere. 3 The total global absorption of solar energy is nearly 1.8 × 10¹¹ MW, 4 which is enough to meet the current power demands ...
