

Analysis of the current situation of solar power generation industry

What is the global solar power market size?

The global solar power market size was valued at USD 253.69 billion in 2023 and is projected to be worth USD 273 billion in 2024 and reach USD 436.36 billion by 2032, exhibiting a CAGR of 6% during the forecast period. North America dominated the solar power industry with a market share of 41.30% in 2023.

What is the contribution of solar energy to global electricity production?

While the contribution of solar energy to global electricity production remains generally low at 3.6%, it has firmly established itself among other renewable energy technologies, comprising nearly 31% of the total installed renewable energy capacity in 2022 (IRENA, 2023).

What was the value of the solar power market in 2023?

Fortune Business Insights says that the global market size was valued at USD 253.69 billion in 2023 and is projected to reach USD 436.36 billion by 2032. What was the value of the Asia Pacific solar power market in 2023?

Will solar power grow in 2022?

EIA projects the percentage of U.S. electric capacity additions from solar will grow from 46% in 2022 (18 GWac) to 54% in 2023 (31 GWac), 63% in 2024 (44 GWac), and 71% in 2025 (51 GWac). Other analysts' projections are lower, with a median value of 33 GWdc in 2023, growing to 36 GWdc in 2024 and 40 GWdc in 2025.

How much has solar generation increased from 2014 to 2023?

o Total peak monthly U.S. solar generation increased by a factor of 8.8 from 2014 to 2023. Note: EIA monthly data for 2023 are not final. Additionally, smaller utilities report information to EIA on a yearly basis. Therefore, a certain amount of solar data have not yet been reported. "U.S. Total" includes DPV generation.

What is solar power market research report?

The research report offers a qualitative and quantitative in-depth industry analysis of the global market. It further details the adoption of solar power systems across several regions. The report provides a detailed competitive landscape by presenting information on key players and their strategies in the market.

Key updates from the Summer 2024 Quarterly Solar Industry Update presentation, released August 20, 2024:.. Global Solar Deployment. About 560 gigawatts direct current (GW dc) of photovoltaic (PV) installations are ...

The South Africa Solar Energy Market is expected to reach 6.68 gigawatt in 2024 and grow at a CAGR of

Analysis of the current situation of solar power generation industry

10.56% to reach 11.03 gigawatt by 2029. Canadian Solar Inc., IBC Solar AG, Segen ...

o In 2023, PV represented approximately 54% of new U.S. electric generation capacity, compared to 6% in 2010. o Solar still represented only 11.2% of net summer capacity and 5.6% of annual ...

In the United States, utility-scale solar capacity additions outpaced additions from other generation sources between January and August 2023--reaching almost 9 gigawatts (GW), up 36% for the same period in 2022--while small-scale solar ...

This report highlights the growth trajectory and significant innovations driving the sector forward. Detailed firmographic data, investment patterns, and regional hubs show emerging trends such as photovoltaics, electrification, and ...

Based on the current situation and analysis of China's PV industry development, this paper proposes the following measures: ... to play an important role in the international PV ...

Three-quarters of all renewable capacity additions globally in 2023 came from solar PV alone. Power generation from solar PV increased to a record 270 TWh in 2022, up 26% from 2021. ...

Each quarter, the National Renewable Energy Laboratory (NREL) conducts the Quarterly Solar Industry Update, a presentation of technical trends within the solar industry. Each presentation focuses on global and U.S. ...
