

Apply for a solar power office building

Can solar panels be installed in office buildings?

Office buildings are ideal for solar panel installation. They have plenty of unused square footage on their roofs to place solar panels. With a sizeable coverage area, your solar panels will generate large amounts of power to meet the demands of your building's energy consumption. Because solar energy is a renewable resource, it will never run out.

Do I need a building permit for solar energy?

A permit is required for the structural support of all solar energy systems: a building permit is not required when all of the following conditions are met. The solar energy device is roof mounted and does not exceed the existing building height at the highest point. The modules and support components combined weigh no

Can you use solar power for a professional building?

Offices and other professional buildings are well-suited to solar energy, as they require large amounts of electricity to power heating and cooling systems, lighting and electronics. Using solar power for professional buildings is also an eco-friendly alternative to traditional electricity that can save your company money on operational expenses.

Is solar power better than wind energy for office buildings?

While solar power is the best renewable resource for some offices, wind energy is more feasible for others. This means each office building will be designed with elements specific to the environmental challenges faced in its particular location as well as factors such as site, building use, and local code jurisdiction requirements.

What is a zero energy office building?

Through zero energy office buildings, companies can also demonstrate environmental leadership, which can encourage employee retention and impress potential customers. For many companies, zero energy offices are a starting point that inspires management, employees, and customers to further reduce their personal environmental impact.

Should your business go solar?

If you ever need to sell your building, many commercial buyers will pay more to have a built-in, reliable energy supply. Going solar also establishes your company's reputation as an environmentally friendly business and positions it as a green leader in your industry.
