

Are there solar power stations in Egypt

Where is a solar power plant located in Egypt?

It is located in Benban(Aswan Governorate) in the western desert,approximately 650 km south of Cairo and 40 km northwest of Aswan. Benban is currently the 4th largest solar power plant in the world. In September 2014,the project was initiated as part of Egyptian government's Sustainable Energy Strategy 2035.

How much solar power does Egypt have?

The biggest chunk of Egyptian solar capacity is provided by the Benban project,which lies 50 km from Aswan and is one of the world's biggest PV sites. Official figures on its capacity vary from 1.4 GW up to 1.8 GW,with the confusion apparently centering on the scope for expansion of some individual elements.

What percentage of solar PV installations are in Egypt?

Solar PV capacity accounted for 13.0% of total power plant installations globally in 2022,according to GlobalData,with total recorded solar PV capacity of 1,109GW. This is expected to contribute 30% by the end of 2030 with capacity of installations aggregating up to 4,002GW. Of the total global solar PV capacity,0.19%is in Egypt.

How many power plants are there in Egypt?
