

# Are there some places where photovoltaic panels cannot be installed

Is installing solar panels illegal in any state?

Technically, no state outlaws or bans solar panels; quite the opposite. Most states have solar access laws that forbid any agreement, covenant, condition, bylaw, or contract that outlaws or limits solar installations by Homeowners Associations (HOA) or other municipal bodies.

Can you install solar panels without putting them on your roof?

Still, a portable solar panel can be convenient for short-term use. Solar panels can be installed as siding, sculptures, window glass, awnings, and even on the ground. Here's where you can install solar panels without putting them on your roof.

Are solar panels a viable option?

However, some states still make installing solar panels functionally impossible by creating laws with "reasonable restrictions," such as increased taxing, energy caps, or even billing solar panel users. Combine these laws with a lack of incentive programs, and solar panels are not viable for homeowners in many states.

Can you collect electricity without putting solar panels on your roof?

Yes, it's possible to collect electricity from the sun without putting solar panels on your roof. If you want to take advantage of solar energy but you can't (or don't want to) put solar panels on your roof, you do have other options.

Where can I install solar panels?

Here are some great options for installing solar panels in places other than your roof. If you have a south-facing wall on your home with about eight feet by eight feet of space, you can install solar panel siding.

Do you need a bulky rooftop solar installation?

Luckily, you don't have to choose between a bulky rooftop solar installation or nothing at all. Homeowners have several options to make use of the sun's energy, from backyard solar panels to solar pergolas and beyond. Many of the best unique solar panel placement ideas integrate seamlessly into a home's exterior. Ready to dive in?
