

Automatic drawing of photovoltaic panels

Why should you use a solar panel layout tool?

Our solar panel layout tool and PV design software make it easy for you to plan and optimize your solar panel installation. With advanced features and a user-friendly interface, you can confidently design a system that meets your energy needs and budget. Try it out today and start saving on energy costs.

How do I create a prelim solar panel layout?

Try out our free online design tool to create prelim solar panel layout. **JOIN US TODAY!** How to use? Search for an address. Select a module brand/model And racking type. Draw a polygon along the roof line. Panels are automatically placed on the roof.

Is Photonik a good solar design software?

Photonik is designed to be the most intuitive solar design software on the planet. To achieve this goal, the tool's designers gave it a host of quality features. (More on these below.) Also of note, Photonik is free to use, which makes it especially enticing to budget-conscious teams.

Do I need to redraw my module layout in PVSyst?

There's no need to redraw your module lay-out in PVSyst. Thanks to our pv plugin, you can simply export your drawings from AutoCAD or BricsCAD to within seconds and start simulating the performance and yield of your system immediately. Both fixed tilt and tracker systems are supported by the .PVC export format or .CSV of ground mesh.
