

Buy solar panels to generate electricity for your home

Are solar panels right for your home?

Solar power is an integral component of our energy future, but you might be wondering if solar panels are right for your home. Thankfully, there are several different options to choose from. This creates an opportunity for all homeowners to live a little greener and with lower energy costs. What Is Solar Power? What Is Solar Power?

Are solar panels a good investment?

Solar panels can power your home entirely or supplement what you receive from your regional power grid. While purchasing solar panels requires an upfront investment, they can save you money in the long run and tap into a renewable power source that has little to no impact on the environment.

Why should you use solar energy to power your home?

Generating energy from the sun is free--using it to power your home can help protect you from rising energy costs. Generate, use, store and charge--all with one fully integrated clean energy ecosystem by Tesla. All of our products work together seamlessly, optimizing your energy usage and savings while minimizing your impact on the environment.

Can you finance solar panels?

But, while you may save less money over the lifetime of your solar panels, you can finance your solar panels with a loan or enter into a power purchase agreement or lease, which reduces the initial cost significantly. Andrew Blok is a former editor for CNET who covered home energy, with a focus on solar.

Can solar panels produce power all day?

Solar panels can't produce power all day. Most geographical locations experience twelve hours of sunlight at most. After that, you'll have to rely upon stored power in a battery or draw energy from the grid if you have a grid-tie system.

How can solar power help you save money?

Power your home with emissions-free, renewable energy directly from the sun. You may qualify for federal, state and local tax incentives that can help cut your installation costs. Generating energy from the sun is free--using it to power your home can help protect you from rising energy costs.
