

Buy solar panels with your own money

How much does DIY solar cost?

When you DIY solar, you can do so with either a solar panel kit, or from scratch. Solar panel kits range in price; a 6kW system can cost anywhere from \$7,000 - \$18,000 before the 30% federal tax credit. However, this doesn't include permitting costs or installation, which would be included if you work with an installer.

How do I finance a solar panel purchase?

If you need to finance your solar panel purchase, the most cost-effective way to do it is to use a home equity loan or a home equity line of credit. Because your house serves as collateral, these options have low interest rates (currently about 3 to 5 percent). The interest you pay is tax deductible.

Are DIY solar panels worth it?

One of the primary appeals of DIY solar panels is that you can save money. According to EnergySage, solar panels cost an average of \$29,410 for a 10-kilowatt (kW) system. Roughly half of that cost goes toward labor, overhead, margin, customer acquisition, and other costs that do not apply to a DIY solar power installation.

Should I buy or lease a solar system?

The answer to this for you depends on several factors: There are two main ways to go solar: buying and owning the system or getting it installed on your home while it's owned by a third party. When buying a system, you either need to pay for it outright or finance it with a solar loan.

How much does a solar panel cost?

The average 8.6 kilowatt (kW) home solar panel array costs approximately \$31,558, according to data from the Lawrence Berkeley National Laboratory. Tax credits, rebates and solar incentives can offset the total cost of solar panels. While the solar panel modules are a portion of the cost, a solar system consists of several other pieces.

Can you finance a solar system with a loan?

While some solar loans are no-money-down options, financing a solar system with a loan will cost more due to long-term interest rates. Solar leases and PPAs are means of financing solar when you can't afford to buy a system or get a loan for one. They often offer a solar power system at no upfront cost to the homeowner.

Today's premium monocrystalline solar panels typically cost between \$1 and \$1.50 per Watt, putting the price of a single 400-watt solar panel between \$400 and \$600, depending on how ...
