

What is China's largest unsubsidised offshore wind farm?

China General Nuclear (CGN) Power Corporation has now connected its entire 900 MW Shanwei Jiazi offshore wind project to the Chinese grid. The project, which reaches a total of 1.4 GW of installed capacity together with CGN's operational Shanwei Houhu wind farm, is the country's largest unsubsidised offshore wind farm, according to Chinese media.

What is Mingyang smart energy doing with CGN wind turbines?

Back in 2019, Mingyang Smart Energy said it had received an order from CGN to manufacture and deliver offshore wind turbines for a combined capacity of around 1,403 MW. The units were said to have been ordered for CGN's Shanwei Houhu, Shanwei Jiazi I, and Shanwei Jiazi II wind farms off the Guangdong Province.

How much electricity does China's offshore wind power plant generate a year?

Together, the two plants are capable of generating 4.5 TWh of electricity per year. A recent report released by China National Offshore Oil Corp (CNOOC) says that China's installed offshore wind power capacity will increase to 32.5 GW by the end of 2022, corresponding to nearly half of the world's total offshore wind capacity estimated at 68.5 GW.

How many MW is China's Wind power project?

The wind-power project has a total installed power generation capacity of 240 MW. /CFP The wind-power project has a total installed power generation capacity of 240 MW. /CFP China General Nuclear Power Corporation (CGN) said on Thursday that it had put an offshore wind farm into full operation off the coast of southeast China's Fujian Province.

What is offshore wind Biz?

Get in front of your target audience in one move! OffshoreWIND.biz is read by thousands of offshore wind professionals daily. China General Nuclear (CGN) Power Corporation has now connected its entire 900 MW Shanwei Jiazi offshore wind project to the Chinese grid.

When did the final wind turbine at Shanwei Jiazi II get connected?

The final wind turbine at the 400 MW Shanwei Jiazi II offshore wind farm was connected to the grid on 20 December, about a month after all the wind turbines at the 500 MW Shanwei Jiazi I were hooked to the national transmission system.
