

# Can I install photovoltaic panels to generate electricity myself

Can you install solar panels on your own?

It's possible to install solar panels on your own, but DIY solar installation requires serious know-how and tools. Some solar companies design solar panel kits targeted toward DIYers. However, these kits are often meant for small builds, such as converting a shed, RV, or boat. Installing a solar energy system requires knowledge of electrician work.

Do you need an electrician to install a solar panel?

Some solar companies design solar panel kits targeted toward DIYers. However, these kits are often meant for small builds, such as converting a shed, RV, or boat. Installing a solar energy system requires knowledge of electrician work. You'll have to work on your roof and with buried wires.

Can you install solar panels off-grid?

Many zoning laws also prohibit installing off-grid solar energy systems. DIY solar panels work best for small projects or to supplement a traditional energy source. If you want to power your home with solar, we recommend hiring one of the top solar companies to design and install your system.

Are DIY solar panels a good idea?

The short answer is: yes! However, it's not really that simple. DIY solar panels may sound like sweet relief for your wallet, but there are a few things to consider before you invest in a home solar kit. Learn more about the differences between installing solar panels yourself and hiring a solar installer.

How much does a DIY solar panel installation cost?

A DIY solar panel installation can save homeowners thousands of dollars in upfront installation costs. The average cost of solar panel installation by a professional solar company is around \$2.95 per watt. For a typical 5 kW (5,000 watt) solar panel system, that works out to \$14,750.

Should you do a DIY solar installation?

If you have a lot of time on your hands and the skills to pull it off, you might be able to go the DIY route. However, if a DIY solar installation seems like more than you can handle, then fret not: there are many highly-rated solar installers that can do the work for you.
