

Canadian Solar Panel Test

Are Canadian solar panels good?

Canadian Solar offers some excellent solar panels at very good prices. The company's products compare favorably on performance with other top brands, and they stand behind them with excellent warranties. Based on product quality and the company's longevity and stability, SolarReviews recommends Canadian Solar panels.

Is Canadian Solar a good brand?

As one of the top solar panel brands, Canadian Solar has a long history of success and big plans for the future. Canadian Solar offers some excellent solar panels at very good prices. The company's products compare favorably on performance with other top brands, and they stand behind them with excellent warranties.

What types of solar panels are available in Canada?

Much like the residential range, the most popular commercial panels from Canadian Solar are the Ku and HiKu series, which are also available in both polycrystalline and monocrystalline varieties.

Does Canadian Solar offer a warranty?

Canadian solar offer either 12 or 15 years a product warranty depending on which module you are looking at, which we would consider to be slightly ahead of the market's expectations. The performance warranty on a solar panel covers a minimum level of output of the solar panel based around a normal degradation rate for the panel.

How much do residential solar panels cost in Canada?

On top of being great quality panels, Canadian's residential solar panels come in at a great price too. Costing an average of \$2.60 per watt, expect to spend about \$15,600 for a typical 6 kW solar system using these panels. Keep in mind that this is just for the panels alone, no other additional costs.

Why should you choose Canadian Solar?

Canadian Solar has a strong history of producing quality panels with the economic backing to likely ensure they fulfill their warranties. The fact that they are globally recognized and consistently one of the top three module manufacturers is a result of their workmanship.
