

China's energy storage system shipment ranking

Is Dyness a Top 100 energy storage brand in China?

Dyness Honored with the Top 100 Brands in China's Energy Storage On March 29, 2024, the 6th Energy Storage Carnival and the launch ceremony of the 2023 Global Shipment Ranking of China's Energy Storage Enterprises, organized by the EESA, officially commenced.

How big is China's energy storage capacity?

According to incomplete statistics from CNESA DataLink Global Energy Storage Database, by the end of June 2023, the cumulative installed capacity of electrical energy storage projects commissioned in China was 70.2GW, with a year-on-year increase of 44%.

Which companies are shipping the most to China?

Demand sustains rapid growth in China, while losing momentum in Europe and the U.S. due to inventory pressure and high interest rate before potential recoveries in the third quarter. Manufacturers shipping the most are CATL, BYD, EVE Energy, Rept Battero Energy, and Hithium.

How many new energy storage projects are commissioned in China?

Figure 2: Cumulative installed capacity of new energy storage projects commissioned in China (as of the end of June 2023) In the first half of 2023, China's new energy storage continued to develop at a high speed, with 850 projects (including planning, under construction and commissioned projects), more than twice that of the same period last year.

Which energy companies have the most GWh shipments?

BYD and EVE Energy followed closely each with shipments of over 25 GWh, while REPT BATTERO and Hithium each ranked fourth and fifth with shipments of over 15 GWh. Despite intense price competition, the leading companies demonstrated significant cost control advantages, reinforcing the "the strong get stronger" pattern.

Is China battery storage market growing?

This article was published by S&P Global Commodity Insights and not by S&P Global Ratings, which is a separately managed division of S&P Global. Mainland China battery storage market has experienced drastic growth since 2022 and is exclusively supplied by local players, leading to Chinese system integrators moving up on the global rankings.

Shipments of energy storage inverters more than doubled in 2020 to reach over 11 GW. As the world's major economies increasingly unite in moving faster toward an energy transition, and governments look to stimulate
