

Contract for photovoltaic panels installed on roof

Can a roof support solar panels?

Make sure your roof can support solar panels. A solar installer, roofing expert, or structural engineer can help you determine your roof's solar suitability.

What is a solar photovoltaic (PV) installation?

A solar photovoltaic (PV) installation comes with a proposal and a contract, so if you're thinking about going solar, it's important to understand what you'll be signing.

Who owns the solar panels on my roof?

The solar panels on your roof are owned by the PPA provider, not you. But instead of paying for the system, you pay a monthly fee for the energy it produces. Since those contracts usually cover a 25-year period, you essentially agree to purchase your energy in advance for a pre-negotiated price.

Should I add a solar energy system to my roof?

You may be considering the option of adding a solar energy system to your home's roof or finding another way to harness the sun's energy. While there's no one-size-fits-all solar solution, here are some resources that can help you figure out what's best for you. Consider these questions before you go solar. See the Spanish version [here](#).

What should a solar installation contract include?

Your solar installation contract should include crucial details about what happens and who is responsible for each, such as: Before your solar panel installation company can begin work on your roof, they have to get construction and/or electrical work permits from the city or county where you live.

What is a solar power contract?

A solar contract is a signed agreement between a person and a solar power installation company that clearly outlines every part of the solar panel installation process, including the steps before, during, and after the actual installation, and who is responsible for each.
