

Current status of IKEA solar power plant

Does IKEA offer solar energy?

Following a rollout of the renewable energy offer in Sweden, IKEA is hoping to expand the service, as well as its solar panel products, to all IKEA markets worldwide. When sourcing energy, IKEA is aiming to offer electricity from solar and wind sites which are five years old or less, in order to spur the construction of new clean energy sites.

Is IKEA partnering with SunPower?

IKEA U.S. and SunPower Corp. (NASDAQ: SPWR) have teamed up to make solar energy easier to access.

Why did IKEA stop selling solar panels?

It was a roaring success, prompting a fourfold expansion of the UK's renewable energy capacity, but it was shuttered at the end of March 2019. This prompted IKEA to stop selling solar panels in the country, because the chain thought it no longer made financial sense for consumers to opt for solar.

When will IKEA start selling solar panels in the UK?

As of April 2023, there have been no updates on when or if Ikea will start selling solar panels in the UK again. The Swedish company has been consistent with its approach: it will sell solar panels when and where they achieve a significant return on investment for consumers.

Does IKEA believe the future is renewable?

"We believe that the future is renewable." Over the last decade, Ikea's parent company has invested around \$2.7 billion in renewable energy.
