

# Do I need to apply for a permit to install photovoltaic panels on the roof

Do I need a permit for rooftop solar panels?

Blue Raven Solar has a team dedicated to submitting, approving, and verifying permits. Here are some of the most common questions associated to permitting for rooftop solar panel systems: 1. Do You Need a Permit for Solar Panels? Yes.

Do I need a building permit for a solar PV system?

Some electric utilities may require that the solar project be reviewed before the local jurisdiction issues a building permit. Pursuing utility approval early in the permit process enables the solar PV system to become operational as soon as possible.

How do I get a permit for a rooftop solar system?

One of the process steps which is more complex is acquiring the necessary permits from city, county, and/or state offices. Blue Raven Solar has a team dedicated to submitting, approving, and verifying permits. Here are some of the most common questions associated to permitting for rooftop solar panel systems:

Do solar PV installations need local government approval?

All solar PV installations need the local utility's approval to link into the electricity grid, a process commonly referred to as "interconnection." This interconnection approval must be granted before a solar PV installation is allowed to operate and is completely separate from local government approval for the solar installation.

Do I need an inspection before installing solar panels?

An inspection before installation is necessary to ensure that your property's electrical system can handle the addition of solar. If you're installing a rooftop solar panel system, an engineer will also need to inspect your roof's structure to make sure it can withstand the additional weight of the solar panels and racking equipment.

Can a rooftop solar PV system be installed on a building?

The vast majority of rooftop solar PV systems are installed on existing structures. Even though very few of these buildings were constructed specifically for installing solar equipment, many of them are well suited for PV systems.

Prior to installing solar, you'll need to obtain permits from your local government for permission to install. Generally, you should expect to have to file for an electrical permit, a structural or building permit, and/or a dedicated ...
