

Domestic manufacturers of solar panels

Who makes American-made solar panels?

American-made solar panels may not always come from American companies, but they are built by American workers. Here's more information about five of the biggest, best companies that make solar panels in the USA. The top five solar panel manufacturers in the U.S. are First Solar, Qcells, Silfab, Jinko Solar, and Mission Solar.

Where are solar panels made?

Four of the biggest manufacturers are headquartered in China and primarily manufacture equipment there (though one of them, Jinko Solar, does have an American manufacturing facility in Florida). The fifth largest manufacturer is a Canadian company, Canadian Solar, which also has a manufacturing facility in Texas.

Who makes first solar panels?

Ohio-based First Solar is the largest manufacturer of solar panels in the U.S., producing about 50% more panels than the next-biggest American-made brand.

What are the biggest solar panel manufacturers?

Some of the biggest U.S.-based solar panel manufacturers include: 1. Auxin Solar. Founded in 2008 and headquartered in California, Auxin Solar is the nation's longest-running Community Solar Value Project (CSVP).

Where are portable solar panels made?

Another portable solar panel option, Ascent Solar, manufactures solar panels for use in extreme environments. Their products are made in Thornton, Colorado, near Denver. They do all research and development, product design, manufacturing and production, and corporate office work at their 139,000-square-foot facility.

Why should you buy American made solar panels?

Solar energy is a great way to cut down on power costs, upgrade your home, and reduce your overall carbon footprint. When you buy American made solar panels, you also infuse the economy with money and support local jobs and companies.
