

Dreamed about installing photovoltaic panels at home

Should you install solar panels on your roof?

Installing solar panels on your roof can both save you energy costs and reduce your home's environmental impact. Even though there are some DIY solar panel options, installing them is a highly complex project, and you'll still need assistance from an experienced professional.

How do I prepare for a solar panel installation?

Installing solar panels helps homeowners save money and invest in cleaner energy. To prepare for an installation, determine your energy needs and home compatibility with a solar panel system. The installation requires complicated electrical work and paperwork that any reliable solar installer can handle.

Should I add a solar energy system to my roof?

You may be considering the option of adding a solar energy system to your home's roof or finding another way to harness the sun's energy. While there's no one-size-fits-all solar solution, here are some resources that can help you figure out what's best for you. Consider these questions before you go solar. See the Spanish version [here](#).

Are DIY solar panels worth it?

DIY solar can be financially worthwhile, but you'll have to take on the burden of a complicated installation where many things can go wrong. You'll still need professional assistance, including a licensed electrician, to properly install your panels. We recommend using a certified solar installation company to ensure a safe and proper installation.

Are residential solar panels a good option?

Throughout the country, residential solar panels have become an increasingly popular option for generating energy for homes. The rising costs of energy across the US, along with falling prices for solar panels, and excellent federal tax incentives, have made solar power a much more attainable and economically beneficial option for homeowners.

Should you install solar panels before installing a new solar system?

The time to contemplate any big near-term additions to your electrical needs is before you install solar because expanding an existing system later can be costly and problematic, says Los Gatos, CA, solar installer and energy podcaster Barry Cinnamon. You'll likely need to replace the inverter, and the new panels won't match the existing ones.
