

Electric photovoltaic panel lifting crane

Are pv-E cranes electrically powered?

All PV-E Cranes are electrically powered, which means lower maintenance costs and different service intervals. The electric crawler cranes operate virtually silently, which is more pleasant for the crane operator and the environment. Our standard set of batteries allows for at least 8 hours of work. Need to work longer?

Can You charge a pv-E Crane while working?

No problem, you can charge via the undercarriage while working. Better for the environment, less pollution: PV-E Crane helps reduce harmful air pollution from exhaust fumes. Reduce your CO₂ and NO_x emissions to zero to help the environment and the health of your fellow human beings.

Why should you choose a pv-E Crane?

Better for the environment, less pollution: PV-E Crane helps reduce harmful air pollution from exhaust fumes. Reduce your CO₂ and NO_x emissions to zero to help the environment and the health of your fellow human beings. Our electric cranes contribute to a sustainable, emission-free lifting solution, ensuring a clean and quiet construction site.

Why should you choose an electric crane?

Electric cranes offer many advantages not just for one stakeholder, but for many others working on the construction site. If you need advice and support on site layout, charging solutions, and/or renewable energy, we can work together to find an ideal total solution for all stakeholders.
