

Electricity storage box types

How many types of electrical boxes are there?

If your project needs electrical boxes or enclosures, and you don't know what are the main types of electrical enclosures, you need to read this guide. I will tell you 76 types of electrical boxes for your business based on material, mounting types, features, applications, and more. You can also check this infographic to have a quick look:

Which type of electrical box is best?

Metal electrical boxes are best for metal-sheathed cable or metal conduit. Weatherproof metal boxes for outdoor use are generally made of aluminum. Plastic electrical boxes are best for Romex or non-metallic cables. Choose an electrical box based on its intended purpose.

What materials are available for electrical boxes?

It's important to know the different materials available for electrical boxes. You can decide between plastic or metal boxes, each with its own pros and cons. Plastic boxes are the most common choice for residential wiring projects. They are lightweight, easy to install, and less expensive than metal options.

How are electrical boxes categorized?

Electrical boxes are also categorized by the number of devices they can accommodate. Single-gang boxes hold one electrical device, such as a switch or receptacle. Double-gang boxes accommodate two electrical devices side by side. For larger installations, you can find boxes that accommodate three or more devices.

What is an electrical box?

This is a circular electrical box that is placed in a ceiling and helps to support devices that are upwards - ceiling fans, lights, etc. Based on the size of the fixtures themselves, you can find these boxes in different diameters, so flexibility in terms of electrical box sizes is available.

Are electrical boxes metal or plastic?

Most electrical boxes are either metal or plastic. Metal boxes are generally steel, while plastic boxes are PVC or fiberglass. Metal electrical boxes are best for metal-sheathed cable or metal conduit. Weatherproof metal boxes for outdoor use are generally made of aluminum. Plastic electrical boxes are best for Romex or non-metallic cables.
