

When the researchers installed their fiber in a supercapacitor they found that the optical properties of the surface plasmons changed depending on the supercapacitor's state of charge, offering ...

Fu Liu currently works at battery sensing and monitoring. ... Lithium-sulfur batteries are considered as promising candidates for next-generation energy storage devices for grid applications due ...

Lithium-ion batteries, with their high energy density, long cycle life, and non-polluting advantages, are widely used in energy storage stations. Connecting lithium batteries ...

In situ plasmonic optical fiber detection of the state of charge of supercapacitors for renewable energy storage
Jiajie Lao¹, Peng Sun², Fu Liu^{1,3}, Xuejun Zhang¹, Chuanxi Zhao², Wenjie Mai², ...

Dongying Fu, Institute of Crystalline Materials, Key Laboratory of Quantum Optics and Quantum Optics Devices, Shanxi University, Key Laboratory of Materials for Energy ...

In situ plasmonic optical fiber detection of the state of charge of supercapacitors for renewable energy storage.
... Jiajie Lao, # 1 Peng Sun, # 2 Fu Liu, 1, 3 Xuejun Zhang, 1 ...

Through the simulation of the gas diffusion inside the battery energy storage container, the response of the detector at the top of the energy storage container is 8.7 s after ...
