Does fishery complementary photovoltaic (FPV) power plant affect radiation and energy flux?

Meanwhile, the underlying surface of PV in land is significantly different from those in lake. The fishery complementary photovoltaic (FPV) power plant is a new type of using solar energy by PV power plant in China. The studies of the impact of FPV on the balance of both radiation and energy flux have been less presenting.

Are fishery complementary photovoltaic power plants a new surface type?

The deployment of photovoltaic arrays on the lake has formed a new underlying surface type. But the new underlying surface is different from the natural lake. The impact of fishery complementary photovoltaic (FPV) power plants on the radiation, energy flux, and driving force is unclear.

What are the coordinates of the fishery complementary photovoltaic demonstration base?

The central coordinates of study area 32°17'55" N, 119°47'39" E, and the altitude is 2 m. The fishery complementary photovoltaic demonstration base is composed of four ponds of 5.7-8.9 acre. The FPV is located on the central the pond with about the water depth from 2.5 m to 3 m.

Does PV power generation affect energy balance closure in FPV power plant?

The period of robust power generation of the FPV power plant was selected to analyse the energy balance closure. We attempted to reveal the impact of the PV power generation process on the degree of energy balance closure by comparing the EBR inside and outside the FPV power plant. The EBRs at different time spans are shown in Table 2.

Why is temperature difference important in fishery complementary PV power plant?

The difference in temperature in various water layers benefits the cultivation of different fish in the fishery complementary PV power plant. Fig. 6.

How a utility-scale photovoltaic (PV) power plant is accelerating?

The utility-scale photovoltaic (PV) power plant is accelerating to achieve carbon peaking and carbon neutrality goals in China. The development of PV plants occupies a large amount of land resources that are important to the Chinese.
