

Who is GCL new energy?

HK) (GCL New Energy) is a new energy company under GCL Group. Its primary business is solar power generation, covering development, construction and operations. GCL New Energy focuses on both centralized and distributed PV power plants to provide the society with sustainable green energy that is clean, safe and efficient.

How efficient is GCL solar energy?

On November 23rd, the official test report issued by the China National Institute of Metrology after authoritative certification showed that GCL Solar Energy's 1 meter × 2 meters perovskite module broke through the industry ceiling, achieving a photoelectric conversion efficiency of 18.04%, setting a new world record.

What is GCL's green energy strategy?

In compliance with the nation's call for "a systematical development of solar energy, silicon energy, hydrogen energy and renewable energy", GCL vigorously promotes the green energy business under its strategy triad of "Technology GCL, Digital GCL, Green GCL".

Who is GCL New Energy Holdings Limited (0451)?

Listed on the Hong Kong Exchange in 2014, GCL New Energy Holdings Limited (0451. HK) (GCL New Energy) is a new energy company under GCL Group. Its primary business is solar power generation, covering development, construction and operations.

Who is financing GCL solar energy?

Currently, investment institutions such as Cathay Capital, Kunshan High-tech, Contemporary Amperex Technology (CATL), Tencent, IDG Capital, Sequoia China, and Temasek have participated in multiple rounds of financing for GCL Solar Energy. Data speaks volumes.

How many power plants does GCL new energy have?

GCL New Energy deploys power plants globally. By the end of 2018, it operated 211 power plants across the world. The board of directors (the "Board") is committed to promoting good corporate governance to safeguard the interests of the shareholders and to enhance the Group's performance.

We started selling off PV plants in 2018 and, with more than 6 GW of solar PV farms sold by end of this June, we have significantly lowered the liabilities and debts of the ...

GCL's tilted single-axis tracker tracks the trajectory of the sun at a fixed tilt angle, ensuring that the tilted plane can receive the maximum solar irradiation, thereby increasing the power generation. The tracker is a low

cost, highly intelligent ...

Accordingly, this "plan" stipulates a 70 GW solar PV power generation capacity target by 2017. The target itself shall be made up equally by large utility-scale and distributed ...

GCL Group has formed a comprehensive business portfolio, including the integration of wind power, PV power, energy storage, hydrogen energy, the optimization of source-grid-load-storage network, a systematic promotion of ...

However, photovoltaic power generation also has some disadvantages. First, the cost of pv power generation is relatively high, requiring a significant investment. Second, the conversion efficiency of solar panels is ...
