

Galvanized tie rod for photovoltaic bracket

What is a tie rod?

Tie rods are commonly manufactured using low carbon steel, but higher strength assemblies can be manufactured. Carbon or alloy steel tie rod assemblies can be supplied either plain finish or hot-dip galvanized, and stainless steel tie rod assemblies are common as well. Portland Bolt estimators can assist in determining the correct rod length.

What is a tie rod assembly?

The second configuration of tie rod assembly consists of two rods with a turnbuckle in the middle and clevises on each end. For this assembly, one rod is threaded right hand/right hand while the other rod is threaded right hand/left hand. A turnbuckle is assembled between the two rods and the assembly is drawn tight by rotating the turnbuckle.

What is a tie rod SAG rod?

Portland Bolt manufactures tie rod or sag rod assemblies in many different ASTM specifications. Two common configurations of tie rod assemblies are used. One configuration consists of a single rod with left-hand thread on one end and right-hand thread on the other end.

How do you connect a tie rod to a turnbuckle?

A turnbuckle is assembled between the two rods and the assembly is drawn tight by rotating the turnbuckle. Occasionally, tie rod assemblies are connected using sleeve nuts or coupling nuts. Tie rods are commonly manufactured using low carbon steel, but higher strength assemblies can be manufactured.

What ancillaries can I attach to my PV array?

From service walkways to conduit, wire trays, optimizers, other MLPEs and monitoring equipment, you can use S-5! clamps, brackets and GRIPPERFIX™; universal utility mounting system to securely attach the above ancillaries to your PV array.

We're well-known as one of the leading hot-dip galvanized steel photovoltaic bracket manufacturers and suppliers in China. If you're going to buy high quality hot-dip galvanized steel photovoltaic bracket at competitive price, welcome to ...
