

Global photovoltaic inverter gap

What is the global PV inverter market share?

Global PV inverter shipments grew by 56% to 536 gigawatts alternating current (GWac) in 2023, reflecting a strong year for the broader solar industry. The top 10 global PV inverter vendors accounted for 81% of the market, according to Wood Mackenzie's 'Global solar inverter and module-level power electronics market share 2024' report.

How did global PV inverter shipments grow in 2023?

Global PV inverter shipments grew by 56% to 536 gigawatts alternating current (GWac) in 2023, reflecting a strong year for the broader solar industry. The top 10 global PV inverter vendors accounted for 81% of the market.

How has global solar PV manufacturing capacity changed over the last decade?

Global solar PV manufacturing capacity has increasingly moved from Europe, Japan and the United States to China over the last decade. China has invested over USD 50 billion in new PV supply capacity - ten times more than Europe - and created more than 300 000 manufacturing jobs across the solar PV value chain since 2011.

What is the global demand for PV inverters in 2022?

The global PV demand of 201 gigawatt alternating current (GWac) in 2022 contributed to 48% growth year-over-year for PV inverters. In terms of inverter shipments, strong growth in Europe, Asia Pacific, and the United States where government support bolstered to meet clean energy goals led to a total of 333 GWac of global shipments in 2022.

How PVBL ranked the top 20 global photovoltaic inverter brands in 2023?

On the first day of the conference, PVBL's annual ranking of the Top 20 Global Photovoltaic Inverter Brands was announced. Preferential policies promoted the inverter market growth in 2023. Most of the major inverter companies won a large amount of orders and expanded their capacity with high shipment volume.

Which countries have experienced double digit PV inverter market growth?

In comparison, North America and Europe also experienced double-digit PV inverter market growth, but it was largely concentrated in the utility-scale sector as residential inverter manufacturers faced slower demand growth and excess inventory from oversupply beginning in 2022.

The number of Asian companies appearing among the world's 10 largest PV inverter suppliers doubled in 2013, with four from China and Japan appearing within the charmed circle, compared to just two in 2012 and none in ...

Annual solar PV capacity additions need to more than quadruple to 630 gigawatts (GW) by 2030 to be on

Global photovoltaic inverter gap

track with the IEA's Roadmap to Net Zero Emissions by 2050. Global production capacity for polysilicon, ingots, wafers, cells and ...

On the first day of the conference, PVBL's annual ranking of the Top 20 Global Photovoltaic Inverter Brands was announced. Preferential policies promoted the inverter market growth in 2023. Most of the major inverter ...

Report Description Photovoltaic Inverter Market Outlook 2032. The global photovoltaic inverter market size was USD 14.27 Billion in 2023 and is projected to reach USD 48.8 Billion by 2032, ...

The global photovoltaic inverter industry was then dominated by the German inverter giant SMA. It was only in 2011 that Sungrow first entered the top 10 shipment volume ranking, marking the beginning of a new era in ...

An isolated photovoltaic micro-inverter for standalone and grid-tied applications is designed and implemented to achieve high efficiency. System configuration and design ...

The PV inverter market has grown rapidly in recent years to achieve record global revenue of \$21 billion in 2023. PV inverters convert DC electricity produced by solar modules into AC electricity to be fed into the grid ...

The global PV inverter market is expected to grow at a CAGR of 13.54% during 2022 to 2028. In 2020, Sungrow Power Supply (Sungrow) surpassed Huawei to become the no.1 industry-leading player in the global PV inverter market (24% ...

Self-sustenance and insulation from global supply chain shocks are some of the key reasons why these countries are pursuing PV manufacturing. In August 2022, the U.S. passed the Inflation Reduction Act ...

The PV inverter market size is valued at US\$ 15.28 billion by 2024, from US\$ 41.87 billion in 2021, at a CAGR of 15.5% during the forecast period. PV inverters are critical components in ...

Global PV inverter shipments grew by 56% to 536 gigawatts alternating current (GWac) in 2023, reflecting a strong year for the broader solar industry. The top 10 global PV inverter vendors accounted for 81% of the ...

An important technique to address the issue of stability and reliability of PV systems is optimizing converters' control. Power converters' control is intricate and affects the ...
