Can a wall hung storage cabinet be heated with a light bulb?

To tote these back and fourth for every project is not practical, so I came up with a solution that works well: a wall-hung storage cabinet that is heated with an ordinary light bulb. The bulb is controlled by a thermostat that allows me to set the ideal temperature for the inside of the cabinet.

How do you electrify a cabinet?

I electrified the cabinet by using a candleabra base light socket; you can suit yourself about how you do this, but I added a 1N4004 diode in series with the bulb. This diode divides the voltage to the bulb in half, and so the power consumption. It has the effect of making the bulb last a terrifically long time.

How do you attach a pegboard to a cabinet?

Use another 3/4-in. strip of pine to brace up the center of the pegboard. Secure it with glue and a few 1-in. brads from the front side of the base. Use a hacksaw to trim them down the hinges, which are a little longer than the cabinet. Install the hinge to the base first.

How do you keep a cabinet warm if it's cold?

Warm glue also works better than cold. I'm sure you can think of other things you would prefer to keep warm. I electrified the cabinet by using a candleabra base light socket; you can suit yourself about how you do this, but I added a 1N4004 diode in series with the bulb.

Can a pegboard wall cabinet be used for tool storage?

There are a number of ways that you can add storage space to your walls, from decorative floating shelves to a fully featured shelving unit. But if you're looking for something that works great for tool storage in your workshop, this pegboard wall cabinet can turn 16 sq. ft. of wall space into 48 sq. ft. of storage space.

How do you make a cabinet from plywood?

Just modify my idea to fit your need. In order to make my existing shelves into a cabinet, I simply cut plywood pieces for each end. After that, all I had to do to finish the construction was to build a pair of doors. I made the door by cutting a piece of plywood to fit the cabinet, attached hinges to both sides, and marked the center.
