

# Going to the countryside to install photovoltaic panels

Where do solar panels go?

Rooftops are the most common places you'll see solar panels, but you have other options too. Installing solar panels can be a great leap toward electricity cost savings and energy efficiency. But the road to making it happen can be long and tricky. One problem you'll likely encounter: Just where will these panels go?

Where should you put solar panels?

Here are the most common places to put your panels, and areas to avoid. Rooftops are the most common places you'll see solar panels, but you have other options too. Installing solar panels can be a great leap toward electricity cost savings and energy efficiency. But the road to making it happen can be long and tricky.

Should you go solar if your home is not suitable for solar?

If your home is not suitable for rooftop solar, you can still get the benefits of clean energy by investing in a community or shared solar program. By going solar, you can play an active role in achieving the nation's goal of a carbon-free electricity sector by 2035. For more information, visit the Homeowner's Guide to Going Solar.

Can solar panels be installed on a roof?

To get the most out of your system, ensure your home can accommodate solar panels before installing them on your roof. Your roof's shading, its orientation and angle towards the sun, and its age all contribute to its potential to generate solar energy. In a perfect world, your panels will face south and tilt between 15 and 40 degrees.

Can solar panels be reinstalled if you move?

Homeowners have a few options with their solar panels when moving. If your new home is only a short distance away, the solar installer should be able to handle the reinstallation at your new location. However, if you are moving to another city or state, you'll have to weigh the costs versus benefits.

How do I choose a solar installer?

Choose a solar installer. An installer can help you determine whether your roof is suitable for solar panels. Begin by researching qualified, insured installers online or asking for recommendations from people who've gone solar. Comparison-shop by asking multiple installers to come assess your roof.
