

Green and low-carbon energy storage

Wanma shares

Does TotalEnergies have a carbon storage project?

The French company also has carbon storage projects in Norway, Denmark, The Netherlands, Australia and Papua New Guinea. By 2030, TotalEnergies says it aims to have carbon storage capacity of more than 10 million tons a year. "Many incumbents continue to lead in the carbon capture space," Adams says.

Why are green energy companies slipping support?

The slipping support comes as inflation and higher interest rates hit the pockets of both investors and companies. That's been especially true for green energy companies that face higher borrowing and raw materials costs to build solar and wind farms and other infrastructure to help decarbonize the economy.

How can a state-owned company support a low-carbon corporate strategy?

Encouraging low-carbon corporate strategies in state-owned enterprises, including by adopting carbon accounting and targeting in order to support national goals. Establishing a high-quality corporate emissions accounting system and mandating climate-related financial reporting.

Should you buy KraneShares global carbon ETF?

Those include KraneShares Global Carbon ETF, which has holdings from the major carbon-compliance markets in California, the northeastern United States and the European Union. This fund "allows investors to benefit from the broader carbon credits market, which is expected to grow as global emissions regulations tighten," Latham says.

Should environmentally conscious investors invest in Green stocks & ETFs?

The timing could be right for environmentally conscious investors to get good value on green stocks and ETFs. Interest in environmentally focused investing declined last year along with shares of renewable energy companies, but this may be good news for investors who remain committed to green companies that could now be bargains.

Are green stocks a good long-term investment?

Investments that focus on environmental solutions could be excellent long-term opportunities for patient bargain hunters. The timing could be right for environmentally conscious investors to get good value on green stocks and ETFs.
