

Can Gwadar Port improve economic security of China and Pakistan?

The results show that Gwadar Port's development could enhance the economic security of both China and Pakistan. With the opening of Gwadar Port, oil and energy in the Middle East will be imported directly to China through Pakistan's oil pipeline.

How will the opening of Gwadar Port affect the Middle East?

With the opening of Gwadar Port, oil and energy in the Middle East will be imported directly to China through Pakistan's oil pipeline. This is not only oil but also goods from Central Asia, and even Europe and the USA will land from Gwadar Port and enter China through the China-Pakistan Economic Corridor (CPEC).

Why is Gwadar Port important?

At the same time, the full operation of Gwadar Port has become an important achievement of the "Belt and Road Initiative" strategy, which can not only meet the trade needs of China and Pakistan but also serve South Asia, Central Asia and the Middle East, and become an important regional business center.

Will Gwadar become the energy hub?

It was reported that about 17.4 million barrels of crude oil and gas condensate passed through the Strait daily (Reuters, May 2019). The proximity to the mainstream of energy in the region has created the potential for Gwadar to become the region's energy hub.

Where is Gwadar port located?

Gwadar port is located at the intersection of the silk road economic belt and the 21st century maritime silk road. The strategic position of Gwadar port is particularly prominent in the future China-Pakistan cooperation.

Will Gwadar Port increase Pakistan's maritime trade?

The development of Gwadar port under the CPEC program could also dramatically increase the capacity of Pakistan's maritime trade while reducing its dependence on the current largest port, Karachi, near the India border.
