

In the past few decades, electricity production depended on fossil fuels due to their reliability and efficiency [1]. Fossil fuels have many effects on the environment and directly ...

Haibo Li's 39 research works with 191 citations and 962 reads, including: Dynamic coupling across energy forms and hybrid simulation of the multi-energy system ... To achieve the ...

Dr. Zhai is the Roy & Caryl Cline Distinguished Chair in Engineering at the University of Wyoming. Dr. Zhai conducts systems research in low-carbon energy and environmental sustainability. ...

The damage of extreme disasters to power grid is becoming more serious, and energy storage control technology is developing into a measure to improve the resilience of power grid. In this ...

Experimental results show that the variable hypergraph coverage based strategy can not only reduce energy consumption, but can also improve the network performance in the datacenter. ...

Aqueous energy-storage systems have attracted wide attention due to their advantages such as high security, low cost, and environmental friendliness. However, the specific chemical ...

Haibo Lin's research while affiliated with Jilin University and other places. ... The lead acid battery has been a dominant device in large-scale energy storage systems since its invention in 1859 ...

Furthermore, Fig. 7 (b) shows thermal energy stored in each system, and its evolution trend is the same as that of the liquid fraction. The energy storage rate is high initially ...

Jian Yin 1,4, Haibo Lin 1,3, Jun Shi 1,3, Zheqi Lin 1, Jinpeng Bao 1, Yue Wang 1, ... Abstract: The lead acid battery has been a dominant device in large-scale energy storage systems since its ...

phase change energy storage technology has been widely used in the fields of electric peak load shifting [1], solar energy utilization [2], energy saving of building [3] and so on. Because PCMs ...

To deal with these challenges in highly penetrated renewable energy systems, the VIC has been proposed [5, 6]. The inertia of rotating rotor is emulated by controlling the ...

The lead acid battery has been a dominant device in large-scale energy storage systems since its invention in 1859. It has been the most successful commercialized aqueous electrochemical ...
