What is HanTile solar roof?

Based on Hanergy's MiaSol's high efficiency Thin Film cells, the Hantile is the ultimate roof application of thin film. Finally all visible surface of a curved solar roof tile can be efficiently used, making it possible to get maximum yield of a tile roof. Under all circumstances.

What services does Hanergy offer?

For medium and large solar projects Hanergy with its partners provides all services needed, from finance/business modelling to final installation and maintenance. Building Integrated PV can bring you attractive green buildings by integrating solar power solutions in flat and slanted roof-tops, windows, facades, curtain walls and ceilings.

What is a HanTile solar chip?

To be known as the Hantile, the new product encapsulates a thin, light and flexible copper indium gallium (di)selenide (CIGS) thin-film solar chip into float glass that maximises the conversion rate and, at the same time, fulfills architectural aesthetic demands, the company said in a statement.

What is building integrated PV?

Building Integrated PV can bring you attractive green buildings by integrating solar power solutions in flat and slanted roof-tops, windows, facades, curtain walls and ceilings. Hanergy provides a wide range of more cost-effective and convenient solar power application products with maximum mobility and flexibility for all daily life purposes.

PV panel comprised with several solar cells, interconnected in parallel/series connection. As a result, the PV panel's output current and voltage are sufficient to meet the grid's or equipment's

Two features--91.5% light transmittance and 17.5% conversion rate at the production level--enable Hantile conversion of solar energy into electricity, bringing both economic benefits and an aesthetically appealing appearance. It ...
