

Hengwo Energy Storage New Energy Background Picture

What does Hanwha energy do?

Since its start in the cogeneration business in 2007, Hanwha Energy has diversified its business portfolio -- including solar power, energy storage systems (ESS), and LNG -- to evolve into a retail energy business that offers a comprehensive set of energy solutions.

Should energy storage systems be mainstreamed in the developing world?

Making energy storage systems mainstream in the developing world will be a game changer. Deploying battery energy storage systems will provide more comprehensive access to electricity while enabling much greater use of renewable energy, ultimately helping the world meet its Net Zero decarbonization targets.

Is China's power storage capacity on the cusp of growth?

[WANG ZHENG/FOR CHINA DAILY] China's power storage capacity is on the cusp of growth, fueled by rapid advances in the renewable energy industry, innovative technologies and ambitious government policies aimed at driving sustainable development, experts said.

How many GW of energy storage are there in China?

As of the end of 2023, China had 86 GW of energy storage in place, with pumped storage accounting for 59.3% and battery storage 40.6%. As battery costs have been dropping significantly, there has been a boom in the adoption of battery energy storage, leading to a significant uptick in new projects.

Should China invest in pumped storage hydropower?

China has been urged to optimise pumped storage hydropower stations such as Huanggou in Heilongjiang Province, while also expanding battery storage (Image: Wang Jianwei /Xinhua /Alamy) Pumped storage hydropower supports China's transition to renewable energy by generating electricity when the sun is not shining nor the wind blowing.

Where is Fengning pumped storage power station?

An aerial view of Fengning Pumped Storage Power Station in Zhangjiakou, Hebei province, in June 2020. ZOU MING/FOR CHINA DAILY
