

Home balcony solar power station

What is a balcony solar power station?

Balcony solar power stations, also known as mini-PV systems, are small "balcony power plants" that typically consist of a few PV modules. These modules are installed on balconies, house facades, terraces, gardens, or garages or carports, and are directly connected to a special power outlet and your apartment circuit via a micro-inverter.

Do balcony solar power plants need a storage system?

For small balcony power plants with an output power of 300W, the use of a storage system is not meaningful, as experience shows that the self-consumption rate is 80-90%. Even for large balcony solar power plants with an output power of 600W, the use of a storage system is not worth it, as direct self-consumption is still 60-80%.

What is a balcony power storage system?

Balcony Power Storage System increases solar power efficiency and reduces electricity consumption from the grid. Nearly all of that solar power generated during the day goes to your home or is stored for later use. And with a plug-and-play setup and a wide range of functions, you can relax while powering your home with sustainable energy.

What is battery storage in a balcony power plant?

Batterlution Balcony Power Plant Battery Storage is a plug-and-play system that uses LiFePO₄ batteries to store excess solar energy from your balcony solar panels. It has dual built-in MPPT controllers and a maximum 800W limited programmable DC output. The batteries are compatible with 99% of micro inverters in the market.

Can a balcony be used as a power plant?

Use balcony brackets to turn your balcony into a green energy power plant (for 410W and 445W PV panels only). Customize your energy based on your home's needs and area's sunlight conditions. Even when you're on vacation, you can manage your energy storage. Let us deliver Balcony Power Storage System, even if you live in an upstairs apartment.

How much electricity does a PowerStream balcony solar system generate?

2. 3.5x is obtained based on the maximum amount of electricity provided by the PowerStream Balcony Solar System as 1039kWh, and the one provided by a home solar system without batteries as 292kWh. Generate your own power from the comfort of your balcony.
