Why do people install home battery storage systems?

"Energy independence is one of the biggest reasons people install home battery storage systems," says Gerbrand Ceder, professor at UC Berkeley and faculty staff scientist at Lawrence Berkeley National Laboratory. "It's seamless, so you don't even notice when power switches from the grid to your battery backup system."

Is a solar-plus-storage system a good investment?

A solar-plus-storage system is likely a worthwhile investment if you're experiencing prolonged power losses multiple times each year. Unfortunately, your solar panels alone won't power your home during an outage because it's a safety risk to utility workers.

How much energy can a battery store?

For most battery systems, there's a limit to how much energy you can store in one system. To store more, you need additional batteries. And, in most cases, batteries can't store electricity indefinitely. Even if you don't pull electricity from your battery, it will slowly lose its charge over time.
