

Home self-generated solar energy

How can I get solar energy into my home?

Solar energy is a key way to get more from your property, insure yourself against power outages, and save some money. You can get solar energy into your home by installing panels on your roof, which is the most obvious method. However, there are other options as well.

How do I choose the best way to use solar electricity?

Before deciding on the best way to use solar electricity at home, assess the potential solar energy that can be produced at your address. Because PV technologies use both direct and scattered sunlight to create electricity, the solar resource across the United States is ample for home solar electric systems.

How do solar energy systems work?

You have three choices for solar energy systems to power your homes and property: Grid-tied -- Your solar array is directly connected to the public electric utility which you pull from when energy demand is higher than your system output. Any excess is sent to the grid. In most places, the electric company credits your bill.

Is generating your own electricity a good idea?

Making the transition to generating your own electricity can be challenging at first. But with some preparation and knowledge, it can also be a rewarding experience that provides cost-effective energy independence. Get a complete home renewable energy system walkthrough from the previous homeowner or builder.

What does it mean to go solar?

When you "go solar," you get a solar panel system installed on your property--usually on your home's roof, but sometimes on your land with ground-mounted solar. Why go solar? Homeowners go solar for all sorts of reasons. Solar panels reduce your energy bills, minimize your reliance on fossil fuels, and increase your independence from your utility.

Should I add a solar energy system to my roof?

You may be considering the option of adding a solar energy system to your home's roof or finding another way to harness the sun's energy. While there's no one-size-fits-all solar solution, here are some resources that can help you figure out what's best for you. Consider these questions before you go solar. See the Spanish version [here](#).
