

House installation of photovoltaic panels

How to choose a solar panel installation site?

Prioritize ease of maintenance when selecting your solar panel installation site. The panels should be accessible for regular cleaning, as dust, bird droppings, snow can accumulate and reduce their effectiveness. -- Remi Akinwonmi, solar expert and clean energy advocate, Advisory Board Member Wondering how to install solar panels?

Should you install solar panels on your home?

Installing solar panels on your home can significantly lower your electricity bills over time and help you live more sustainably. It's one of the best decisions homeowners can make both for the environment and their property value. Professional solar installation companies typically install solar panels.

How do I prepare for a solar panel installation?

Installing solar panels helps homeowners save money and invest in cleaner energy. To prepare for an installation, determine your energy needs and home compatibility with a solar panel system. The installation requires complicated electrical work and paperwork that any reliable solar installer can handle.

Should you install solar panels on your roof?

Installing solar panels on your roof can both save you energy costs and reduce your home's environmental impact. Even though there are some DIY solar panel options, installing them is a highly complex project, and you'll still need assistance from an experienced professional.

How do I choose a solar panel system for my home?

Before you size a solar panel system to fit your energy needs, consider undergoing a home energy audit to uncover anything that makes your home less efficient. Switching to energy-efficient lighting and appliances or weatherizing your home may help to lessen your electricity expenses. 2. Determine if your home is structured for solar

Can solar panels be installed on a south-facing roof?

For homes in the Northern Hemisphere, a shade-free, south-facing roof with solar panels placed at a 30-degree tilt is ideal for production. This is not to say that having a roof that is partially shaded, or east- or west-facing, puts a solar PV system out of the question.
