Are solar generators a good option for your home?

Solar generators are quiet, lack any harmful fumes and exhaust, and are completely renewable. With a handful of well-placed solar panels, you can provide a FREE supply of backup power for your home. Today, solar home backup power is within reach of everyone.

Can a solar generator power a whole house?

Probably not, unless you get a large solar generator and you have a tiny home. Solar generators are meant to power and charge just a few electronics, not the entire house. If you want to backup your entire house, go with a wired system complete with solar panels on the roof and a high-capacity battery bank.

How much power does a portable solar generator use?

The wattage required to run each item may vary, and most portable solar generators can power in the range of 100-500 watts. Smaller units typically have a lower power capacity and can only charge small devices.

What is the biggest portable solar generator?

The biggest portable solar generator from Jackery easily found its way to my list. The 2.16 kilowatt-hours of capacity are enough to power a full camping setup for a few days. And if you hook the 2000 Pro to six 200W solar panels, you can get it fully charged in less than 3 hours.

How do shoppers choose a solar generator?

How much shoppers want to spend on a solar generator is another important consideration. As solar generators increase in size and capacity, so does the price. Keep in mind that most solar generators don't include solar panels, so that extra purchase will add to the expense. The solar generator should match shoppers' intended purpose.

Can a solar generator be used as a whole home power backup?

Given their portability and ease of operation, solar generators offer a unique energy solution for those on the move who need some extra electricity. That being said, the limited power capacity, slow recharge time, and dependence on the sun limit the usability of solar generators as whole home power backup systems.
