How much does a solar inverter cost?

For an average-sized installation, inverters typically range between \$1000 and \$1500. That cost can go up quickly though as the installation gets bigger. Each year, the National Renewable Energy Lab performs a cost benchmark of the solar industry, looking at average installation costs, inverter and panel costs, and a host of other related topics.

Is a solar inverter cost-effective?

The cost of a solar inverter is one of the most important factors in determining whether or not your solar power system will be cost-effective. Luckily, a high-quality solar inverter is now possible at a reasonable price.

What factors affect solar inverter costs?

Factors that affect solar inverter costs include: System size- Your inverter's input-wattage rating should be close to your solar panel system's output rating. U.S. residential solar panel systems typically fall in the 5 kilowatt range. Efficiency - The industry standard for peak efficiency is 97%. More efficient models often cost more.

What is the best solar inverter?

The best solar inverter depends on your solar-panel system's size and location. String inverters are affordable, efficient, and common for residential solar systems. However, microinverters converting power on each individual panel may be better if some of your panels get shade for part of the day.

How much does a 6 kW inverter cost?

Inverters typically contribute for around 6% of the overall installed cost, with an average cost of \$0.28 per watt and an average installation cost of \$3.63 per watt. This suggests that the inverter should account for around \$1,100 of a total cost of \$18,308 for a 6 kW installation.

Are inverters cheap?

At around 6% of an installation's total cost, inverters aren't cheap so you need to make sure you're getting a good product before moving forward. And when you are talking with installers and receiving estimates, do some quick math to make sure all the costs add up.

On average, the total cost of a solar inverter for a medium-sized solar panel system installation ranges from \$800 to \$3,000. The pricing of solar inverters varies depending on their size and whether they are string inverters, ...

Inverters can cost almost as much as solar panels depending on the type you select. They convert the direct current electricity your solar panels produce into alternating current that household appliances use.
