How much does it cost to install solar panels?

According to our solar experts, solar panels cost about \$19,000 to install in the United States, on average. While the price tag seems steep, incentives and payment options help make the cost of going solar easier to manage. The total cost of a solar installation depends on your location, energy usage, and even the type of equipment you use!

How do you price solar panels?

In our expert opinion, the most effective and accurate method for pricing solar panels is the gross cost. Let's explain why and then discuss each pricing model in detail. A lot of work goes into ensuring that you can safely turn on your solar power system—the process is much more involved than simply attaching solar panels to your roof.

How much does a solar panel upgrade cost?

Electrical panel upgrades: Not all homeowners need to get a new electrical panel when they go solar, but if you live in an older home or your breaker box is too small, you may need to get an upgrade. Depending on the project, and electrical panel upgrade for solar could cost between \$2,000 and \$3,000.

Are DIY solar panels worth it?

One of the primary appeals of DIY solar panels is that you can save money. According to EnergySage, solar panels cost an average of \$29,410 for a 10-kilowatt (kW) system. Roughly half of that cost goes toward labor, overhead, margin, customer acquisition, and other costs that do not apply to a DIY solar power installation.

How much does a solar project cost?

For example, if you receive a solar quote for \$25,000, you can expect labor to make up around \$1,375 of the all-in cost. (Check out our solar calculator to estimate the cost of your project.)

How much does solar cost per watt?

To put that in perspective, using the modeled market price (MMP) of \$2.95 per Watt for residential solar, labor costs contributed just 16 cents per Watt of solar capacity installed. That's tied with structural balance of system (racking) for the second smallest piece of the solar cost pie, as shown below.
