

# How much is the discount for renting solar panels

How much does a solar lease cost?

Solar leases usually require zero up-front costs and only include monthly fees. However, these monthly fees may increase over time. Many lease contracts include escalator pricing that adds 1%-5% to your annual fees. For example, if you pay \$150 per month in your first year, it could increase by a minimum of 1% the following year.

Should you lease solar panels?

Thankfully, most leases include a 'power production guarantee', which means if your panels don't produce a certain amount of power, you'll pay less for your monthly lease payment. Although solar leases make panels more accessible by removing the upfront costs, users aren't able to save as much as they would if they buy the panels outright.

Is a solar lease a good deal?

Most importantly is the cost you're currently paying for electricity as well as how much the monthly cost of a lease may be. If a leased system can shave a significant amount off your energy bills -- more than the cost of the lease itself at least -- a solar lease can be a good deal.

Can you sell a solar system under a lease?

Under a solar lease, you won't own your solar system, but will still benefit from its generated electricity. A leased solar system can make selling your home more difficult because the next owner may not want to take over your lease payments. What is a solar lease?

Do you have to pay a solar lease payment?

But, you'll still have to pay your solar lease payment. Usually, the lease payment will be lower than what your utility bill was before installing solar. So, if your electric bill is \$150 per month, and your lease payment is \$100, you're saving \$50 per month with a solar lease.

How long does a solar lease last?

The typical solar lease lasts around 20 years, but terms may vary between solar panel installation companies. Some companies offer leases for up to 25 years, which aligns with the average home solar panel life span. Your lease agreement will include panel maintenance and servicing terms for the length of your contract.

Solar Power Georgia: Solar Power Georgia is a local company based in Atlanta that specializes in residential and commercial solar panel installations. Their prices range from \$3.25 to \$4.25 per watt, with an average cost of \$3.75 per ...
