How much does a 6kW Solar System cost?

Including racking and mounting, an average 6kW solar system would cost about \$18,000 given the US average solar panel cost of about \$3.00 per watt as of January 2023. After applying the federal solar tax credit of 30%, that works out to \$12,600.

What is NREL's PV cost benchmarking work?

NREL analyzes the total costs associated with installing photovoltaic (PV) systems for residential rooftop, commercial rooftop, and utility-scale ground-mount systems. This work has grown to include cost models for solar-plus-storage systems. NREL's PV cost benchmarking work uses a bottom-up approach.

How are PV production costs modeled?

The costs of materials, equipment, facilities, energy, and labor associated with each step in the production process are individually modeled. Input data for this analysis method are collected through primary interviews with PV manufacturers and material and equipment suppliers.
