

# How to deal with fake labels on photovoltaic panels

How to tell if a solar panel is fake?

If you notice this fault on a solar panel, consider its quality and alignment are important. Each solar panel comes with a tempered glass panel. This glass panel protects the solar panel surface from scratch. You will notice some scratch on a fake solar panel because of this counterfeit material.

Can a fake solar panel damage your home?

On the contrary, a fake solar panel will damage quickly because of its substandard materials. An original solar panel can perform in any weather conditions including rain, winter, and storm. But, a fake solar panel can not stand in a hazardous situation.

What are the disadvantages of fake solar panels?

Fake solar panels naturally come with substandard materials, and their outer protective coating is not so stable. It will be removed within a short time. The body of the panel can present the other visible defect easily. The alignment of a fake solar panel is not perfect. The connecting cells are misplaced or not connected perfectly.

How do I avoid solar panel scams?

Getting multiple quotes and thoroughly vetting installers is the best way to avoid solar panel scams. You can also use solar.com to compare quotes from our network of thoroughly vetted installers.

What are counterfeit solar panels?

Like other electrical products and devices, counterfeit solar panels are also available in the market. Fake solar panels represent the panels that come with faulty design and don't have power production capacity. In general, solar panels are made with silicon, and the standard manufacturing process ensures the quality of the panels.

How do I know if a solar company is a scam?

Be wary of solicitors. Always verify the identity and credentials of anyone claiming to represent a solar company. Unscrupulous solar companies may employ aggressive or dishonest sales tactics to close deals quickly, especially if the proposed solar installation isn't in your best interest.
