What are the best techniques for solar inventory management?

The best techniques for solar inventory management are the Reorder point formula, Consignment and Safety Stock. Solar Inventory includes inventory management of solar modules, solar cells, PV materials, solar paste, silicon wafers, frames, backsheets, junction boxes, PV glass, PV Equipment, PV connectors and racking & mounting.

Why is solar inventory management so difficult?

The volatile nature of the solar industry makes Solar Inventory management a challenging task. Excess solar inventory can very quickly be made obsolete by new technology. Solar inventory can also get devalued because of frequent price drops.

Why is inventory management important in the solar industry?

And so, an important objective of inventory management in the solar industry is to track inventory not only across multiple warehouses but also across multiple trucks, which themselves, can be considered as mini-mobile stores.

What happens if solar inventory is too high?

Excess solar inventory can very quickly be made obsolete by new technology. Solar inventory can also get devalued because of frequent price drops. Sales cycles are not very predictable because demand is closely linked to consumers' energy bills, price volatility and incentives provided by governments.

How has the solar industry innovated over time?

The Department of Energy has an excellent resource called the Solar Innovation Timeline where you can see how the solar industry has innovated over time. While this innovation has improved the throughout of solar modules and helped bring the price down, it has also created a risk of obsolescence which very much impacts inventory management.

Do solar panels have a financial return on investment?

The financial return on investment from a solar project is directly related to the performance of the solar asset. Solar panels degrade over time and lose their efficiency. To maximize ROI, it is important to monitor and manage the performance of solar assets throughout their lifetime.
