

How to do the power grid WeChat interview

What questions will be asked in power grid interview?

I interviewed at Power Grid Corporation of India (New Delhi) in Dec 2019. It was conducted in New Delhi & mostly questions from college project & job experience. Subject-wise power system and electrical machines will be mostly asked in interview. Apart from that HR questions will be asked. I applied through college or university.

What is the difference between a smart grid and a traditional grid?

I started by using simple analogies to explain the basic principles - comparing the traditional grid to a one-way street where electricity is delivered from power plants to homes, while the smart grid is like a two-way street that allows for communication between utility providers and consumers.

How does a power grid affect power quality?

Fluctuations and disturbances caused by high penetration of electronic loads on a power grid can affect power quality. Addressing these challenges requires a blend of modern engineering practices and proactive grid management strategies.

Why do we need a power grid?

Power grids are the backbone of modern society, an intricate and expansive network that ensures electricity flows from producers to consumers, powering homes, businesses, and essential services. As our world becomes increasingly reliant on stable and sustainable energy sources, the importance of a robust power grid has never been more pronounced.

Can small-scale power sources be integrated into the existing grid?

For those with expertise in distributed generation, this question is a chance to showcase your strategic approach to integrating small-scale power sources into the existing grid. It requires a deep understanding of the current infrastructure's capacity, the fluctuating nature of renewable energy sources, and the regulatory environment.

What makes a successful grid integration?

Successful integration is evidenced by pilot projects that demonstrate the use of advanced software for grid management, which optimizes the dispatch of distributed resources and enhances grid resilience.

To complete the transaction, enter your six-digit Alipay or WeChat Wallet payment PIN. For water or gas, input the invoice number (nine digits for water and 10-11 digits for gas) into the relevant field in Alipay or ...
