

How to install photovoltaic panels and light tubes in your home

How do I choose a solar tube installation?

Look thoroughly at your interior space and identify areas that lack sufficient natural light. A solar tube installation can greatly benefit common spaces, including bathrooms, hallways, and dark corners. Assess the availability of direct sunlight and determine the most suitable locations for your solar tubes.

Why should you install a solar tube?

By installing a solar tube, you can bring abundant natural light into your interior spaces, transforming them into bright and inviting areas. The detailed steps and considerations outlined in this guide give you the knowledge and confidence to embark on a successful solar tube installation.

How do I install my own solar panel array?

The easiest way to install your own solar panel array is to buy a solar panel kit. The main solar components that come with every solar power system or solar panel kit are: Solar Panels Solar panels convert sunlight into electricity through a process called the photovoltaic effect.

How to install a solar tube on a roof?

Make the necessary adjustments to clear the path for the solar tube. Measure and mark the precise location where the solar tube will penetrate the roof. Accurate measurements will ensure that the solar tube aligns perfectly with the opening on the ceiling, allowing for unobstructed light transmission.

How do you install a solar system?

Once the solar panels are installed, the system needs to be activated. This involves interconnecting the solar panels, installing the inverter, and commissioning the system. During this step, installers should note that as long as the solar panels are receiving sunlight, they have an open circuit voltage.

Can I install solar panels myself?

You can install solar panels on your home yourself. You will need some electrical wiring experience, and we suggest that you also use a professional solar contractor or electrician to do the wiring and connection processes to ensure that you: Do not start an electrical fire that damages or destroys your home, solar array, and solar components.
