

# How to install solar power generation in Daojue

How do I get solar power?

Here are the steps to take to get powered by sunshine. Choose a solar installer. An installer can help you determine whether your roof is suitable for solar panels. Begin by researching qualified, insured installers online or asking for recommendations from people who've gone solar.

How do I prepare for a solar panel installation?

Installing solar panels helps homeowners save money and invest in cleaner energy. To prepare for an installation, determine your energy needs and home compatibility with a solar panel system. The installation requires complicated electrical work and paperwork that any reliable solar installer can handle.

How do I estimate the performance of my solar installation?

The National Renewable Energy Laboratory (NREL) has a calculator to estimate the performance of your solar installation. You can input your address and the NREL will use existing data to estimate your power generation potential. You can also adjust the information based on the tilt angle, number of panels, and module type.

Should I add a solar energy system to my roof?

You may be considering the option of adding a solar energy system to your home's roof or finding another way to harness the sun's energy. While there's no one-size-fits-all solar solution, here are some resources that can help you figure out what's best for you. Consider these questions before you go solar. See the Spanish version here.

How do I choose the right size solar power system?

Evaluating your energy usage will help you choose the right size solar power system for your needs. You won't overinvest in panels but will still produce enough energy to cover your electric costs each month. Solar irradiance is the power per unit received from the sun. Essentially, it refers to how powerful the sun's rays are.

How do I install a solar system?

Engineering site visit The first step to installing your solar system is an engineer site visit. After you sign a solar contract, an engineer will come by your property to evaluate the electrical status of your home and ensure everything is compatible with your incoming solar installation.
