

How to install the photovoltaic panel camera

How do I choose a solar panel for my camera?

Step 1. Please choose a location for your solar panel that gets the most sunlight throughout the year. The Reolink solar panel needs only a few hours of direct sunlight to sufficiently power up your camera daily. The amount of energy that the solar panel can produce is affected by weather conditions, seasonal changes, geographic locations, etc.

How do I adjust the solar panel & camera?

When you have the unit mounted in an optimal location, the solar panel and camera can be adjusted at different angles and rotated as needed. In the Blink app you will see External Power as "OK" for the status in the Outdoor (3rd Gen) camera's settings, once the batteries in the Solar Panel Mount have a charge.

How to connect reolink battery-powered camera to a solar panel?

Connect the solar panel to the Reolink battery-powered camera with the micro USB cable. Make sure the solar panel is not blocked. The energy harvesting efficiency drops drastically even when a small portion of the solar panel is blocked. Please don't install the solar panel completely horizontally.

How do I install and Configure my Blink solar panel mount?

The following easy steps explain how to install and configure your Blink Solar Panel Mount. You must first have a fully functional Blink Outdoor (3rd Gen) camera set up in your Blink account, before attaching the camera to the mount. In addition, the lithium batteries must remain in your outdoor camera before connecting it to the solar panel mount.

Can I use a blink outdoor camera with a solar panel mount?

You must first have a fully functional Blink Outdoor (3rd Gen) camera set up in your Blink account, before attaching the camera to the mount. In addition, the lithium batteries must remain in your outdoor camera before connecting it to the solar panel mount. Other Blink outdoor cameras (Outdoor 4, XT or XT2) are not supported.

How do you attach a solar panel to a wall?

Screw the bracket to the wall. If mounting to brick, concrete or stucco, use wall anchors and 6mm drill. Slide the Solar Panel onto the bracket until it clicks into place. Loosen the adjustment nut and adjust the positioning as required. Tighten the adjustment nut when positioned.
