

# How to open a locker

How do you open a locker door?

**A Simple Turn:** Rotate the key. Depending on the lock, this might be clockwise or counterclockwise. As you turn, you'll feel a subtle shift--this indicates the lock releasing. **Access Granted:** Gently pull the locker door towards you. **Perfect for those who prefer customizable security:** The lock has a four (4) digit combination setting.

How do I reopen a locker?

**Find an available locker:** Use the operation knob to open the locker door and put your belongings away. **Scramble:** After locking your restable combination lock scramble the (4) dials to secure your belonging and keep the lock closed. **Reopening the lock:** Use the same unique (4) dial combination to reopen the lock and retrieve your belongings.

How do you open a school locker?

See Step 1 to begin learning how to open 99% of all standard school lockers. (Note: some locks may open differently) Spin the dial at least three times to the right (clockwise), all the way around. This clears the lock of any previous numbers. If at any point in putting in your combination you mess up, do this again to start over.

How do you open a locker if it won't open?

Pull the lock open and out of the hole, or pull the latch or handle, if there is one. Otherwise, tug on the knob to open the locker. If your locker just won't open, try it again with the last number being five before or after your "official" last number. Sometimes the older locks get, the shakier they get in their requirements or abilities.

Why can't I open a locker door?

If the lock is built into the locker, you'll now be able to open the door. If the lock doesn't open, try the following: Rotate the dial a couple more numbers to the right (clockwise). The gates in these cheap locks are not always aligned correctly. Clear the lock and try entering the numbers again.

How do I open a lock?

Pull up on the U-shaped lock to open it. Once you've successfully input your combination the lock should easily come off. To review: Spin the dial 3 times clockwise, landing on your first number. Spin the dial counterclockwise 1 full rotation before landing on your second number. Spin the dial clockwise to your final number. Open the lock.

**Step 4:** Pull down on the combination lock to open. Ta-da! If it doesn't open, return to step one and try again. **Tips to Help Your Child Be Successful with their New Lock.** Before school starts, ...
